Equinox Features

Equinox continues the chain of impressive, revolutionary, yet functional RocketTheme templates. It combines incredible styling with refined and powerful code to help your website achieve its maximum potential.

- **Fully CSS Design**
  Equinox features a lean and clean tableless design for maximum performance.
- **Stylish Typography**
  Equinox has professionally styled typography to bring that extra element to your content.

- **Custom Modules**
  Specialised styling for RokSlide has been placed in **Equinox** for quick installation.
- **12 Module Positions**
  With a Module Position count of 12, you will be able to facilitate any layout that you wish.

- **Menu Extravaganza**
  The new **RokMooMenu** is now accompanied by its predecessor, **Suckerfish** in a toggle option so you can easier interchange for maximum compatibility. The versatile
SplitMenu
is also in place.

Joomla 1.5 Native

A Joomla 1.5 native version of **Equinox** is available. The front-end of your site will be the same as   **Equinox** 1.0.x but Joomla 1.5 allows for the option of back-end parameters. Therefore, all the index.php configurable options are easily accessible in the Joomla 1.5 administrator. Simply go to
Admin -> Extensions -> rt_equinox_j15
-> Edit. All the options will appear in the right column such as the transition type for RokMooMenu.
