Learn all about the exciting new RocketTheme exclusive modules that are included in the **Equi nox**

template release. Here you can find instructions for installation and configuration for each of the custom modules.

Video Tutorial Currently Available!

Launch the Joomla Template Module Installation Video Tutorial now! (Requires Flash)

ep One: Installing the Module

- Download the **equinox_extensions_j15.zip** archive from the **Equinox** download section of the RocketTheme Joomla! Club. Unzip the archive, inside you will find individual zip files for each of the modules.
- Login in to your administrator console on your Joomla! website and navigate to the **Extensions**

menu item, and select

Install/Uninstall

from the dropdown menu.

- In the **Upload Package File** section, click the **Choose File** button and select one of the **mod_modulename.zip**

that was inside of the zip file you downloaded earlier. Next click the

Upload File & Install

button to install the module.

Step Two: Publishing the Module

- Now the module is installed it must be published in the appropriate module position and configured to suit our needs. From the top menu, select **Extensions** then **Module Manager**
- This will take you to the **Site Module Manager** which allows you to configure the placement and configuration of all modules in your Joomla! website.
- Locate the module from the list. Remember there could be a few pages. Once you have found it, you can publish in 2 ways: The first is selecting the cross next to the tile or clicking the title then set **Enabled** to **Yes** followed by a Save.

Navigating to the Modules

In the Joomla Administrator, go to **Extensions** and then **Module Manager**. This will bring up a list of all of the installed modules. Find the module name in the list and click on the title to go to the Module configuration.

St
